

What it costs, and what makes it cost that.

Four things I do: build the website, keep it current, run your social, and run your Google Ads. Take one or take all four. Everything monthly is month to month, cancel anytime.

Every site is built for the phone first, because that is where people look you up. You own the site and the domain. It goes live within 48 hours of your approval.

STANDARD

\$500 – \$1,000

one-time

One page, built all the way out. Eight to ten sections that cover everything a customer needs.

- Your photos, hours, what you sell and contact
- Tap to call, tap for directions, a form that reaches your phone
- A live "open now" that is right all seven days
- Your colours and your sign's lettering, not a template
- One interactive piece built from what you actually sell

PREMIUM

\$1,000 – \$3,000

one-time

More room, more moving parts, and a custom interactive built out of what you actually sell.

- Everything in Standard, with extra pages
- A custom interactive piece built for you
- An opening built from your own sign or logo
- Live pieces: open now, today's hours, events

CUSTOM

\$3,000 +

quoted to the job

A bigger or more specialised build, priced once we agree exactly what it needs to do.

- Several full pages, each with a job
- Booking, schedules, ordering, video
- Systems that need to be maintained
- Quoted after we scope it together

What moves the price

THE HONEST VERSION

It is not a photo count, and it is not a better-or-worse thing. Every site I build gets the same care: your own colours, your own lettering, a live "open now", and one interactive piece nobody else has. **What moves the price is how much site there is** — how many pages, how deep that interactive piece goes, and how much of your real menu, schedule and story gets built in.

Pages

How much site there is to build.

STANDARD	One page, built deep
PREMIUM	A main page plus the extra pages you need
CUSTOM	Several full pages, each doing its own job

Your one-of-a-kind piece

Something interactive, made out of your actual offer. Nobody else has it.

STANDARD	Every site gets one — built from what you really sell
PREMIUM	A deeper one — tap an occasion, see the cake you made for it
CUSTOM	Several, or one that runs something: booking, ordering, a live schedule

The opening

The first thing someone sees. It does most of the selling.

STANDARD	Your real sign or logo , lifted straight off your own materials — never redrawn
PREMIUM	That, plus a short opening event — a few seconds, plays once, then sits still
CUSTOM	A full opening sequence, sometimes with video

Reviews

Pulled from your Google or Facebook, word for word.

STANDARD	Your real reviews, real names, word for word
PREMIUM	Plus each reviewer's real profile photo , pulled from the same place the review came from
CUSTOM	Same, plus sorting and filtering

Your content

Typing your real menu, prices, hours and story into the site.

STANDARD	Hours, contact, and the main things you sell
PREMIUM	Your whole menu or service list with real prices, built to open up as people tap
CUSTOM	Plus schedules, events, classes and booking

Photos

How they get used — not how many you send.

STANDARD	Your existing photos, cleaned up and placed properly
PREMIUM	Colour-matched and cropped so the whole site looks like one thing
CUSTOM	Plus photos and video I come and shoot

Making it look like you

Colours and lettering taken from your real place, not a template.

STANDARD	Colours read off your own photos , headline lettering matched to your outside sign
PREMIUM	The same, carried across every extra page and piece
CUSTOM	Full identity work across everything you hand out

Live pieces

Parts of the page that change by themselves.

STANDARD	A live "open now" and all seven days of hours, right to the minute
PREMIUM	Plus what is on today, and a countdown to your next event
CUSTOM	Schedules, booking and ordering that stay current on their own

Keeping it current

MONTHLY · OPTIONAL

WHAT I DO

- New hours, new photos, new prices, new specials — you text me, I change it.
- Hosting, backups and fixes are on me.
- Nothing breaks and sits broken.

\$50 – \$200 / month

Depending on how often things change. Month to month, cancel anytime, plus tax.

Social media

MONTHLY

WHAT I DO

- Three posts a week, using real photos of your place and your work. Each one goes out on both your Facebook and your Instagram — around twelve to fifteen posts a month across the two.
- Written the way you talk. On an optional 20-minute call I learn your words, and the ones you would never use.
- Your Google listing kept current, so the people searching you find the right hours and the right phone number.
- One page a month: what went out, and what came back.
- 25 business cards with a QR code straight to your site.

\$350 / month

Standard. More posts than that is \$350 plus a quoted add-on. Month to month, cancel anytime, plus tax.

WHAT IT DOES

- Regulars see you every week instead of whenever they remember.
- Messages that start with "I saw you on Facebook."
- It builds. It is not a switch you flip — the first month looks like presence, and the months after that look like habit.

What you do: add me through Business Suite, which takes five minutes and never needs your password, then send me photos when you have them. I shoot some too.

Ads put you at the top of the page when somebody nearby searches for the thing you sell — today, not eventually. Two separate pots of money, and they never mix:

YOUR AD BUDGET

You pick it. It stays on your card.

This is the money that goes to Google to actually show the ads. It never passes through me. You are only charged when somebody actually clicks — not for showing up. We set the monthly number together and you can change it any time.

MY FEE

Introductory. Ask me.

Writing the ads, choosing the search terms, setting the area they run in, and checking them every week to cut what wastes money and push what works.

WHAT IT CAN DO

- Catch people at the exact moment they are searching — "custom cakes near me", "birthday cake Enumclaw", "wedding cake".
- Show up for the busy stretches: holidays, graduation, wedding season.
- Every call and message from an ad gets counted, so you know exactly what it did.

STRAIGHT TALK

- Ads need somewhere to land. Paying for clicks that arrive at a listing you do not control is money spent badly — the site comes first.
- They take a few weeks of tuning before the spend gets efficient.
- They stop the day you stop paying. Unlike the site, you are renting the attention.
- The free step comes first. Claiming your Google Business Profile and getting the right phone, hours and website on it costs nothing, and I do that before anyone spends a dollar on ads.

Put together

WORKED EXAMPLES

Three common ways it goes. Using a \$1,000 site as the example — swap in whichever tier fits.

Just the site

Website	\$1,000
---------	---------

Once	\$1,000
------	---------

You own it, it is live, and it is finished. Come back for changes whenever you want them.

Site and care

Website	\$1,000 once
---------	--------------

Care	\$50 – \$200 / mo
------	-------------------

Then	from \$50 / mo
------	----------------

For when the menu, the hours or the specials move and you would rather text me than think about it.

THE PACKAGE

Site and social

Website	\$1,000 \$900
---------	--------------------------

Social	\$350 \$250 / mo
--------	-----------------------------

Then	\$250 / mo
------	------------

Take both and the build comes down \$100 and the monthly comes down \$100. The 25 QR business cards come with it.

You own it

The website and the domain are yours, in your name.

No contracts

Everything monthly is month to month, cancel anytime.

Live in 48 hours

From the moment you approve it.

Say yes and I send a PDF

One page that confirms the deal. No lawyers.

Changes before it goes live

Tell me anything you want different and I fix it first.

If it is not working

Tell me and we change it. That is the whole policy.
